

රෝයල් ස්ටාර් සනීපාරක්ෂක විඩේ Electronic Bidet

FUNCTIONS

දැවෙන ප්‍රශ්නයකට නියම පිලිතුර

Washing

Sprays water through nozzle to ensure cleanliness of the buttocks. Water temperature and pressure can be set to 4 different steps suitable to respectable users.

Bidet

Specially designed for women's hygiene. Sprays water through separate nozzle to alleviate feminine discomforts. Water temperature and pressure can be set to 4 different steps suitable to respectable users.

Dry

Blows warm air toward buttocks for heightened satisfaction after washing. Air temperature can be adjusted to 4 different temperatures.

Seat Temperature

Seat temperature can be preset and can also be adjusted to 4 different temperatures with a high up to 42°C. Helps convenient use of bidet in cold environments.

Two nozzles

There are separate nozzles for cleansing and for ladies use. A separate nozzle is needed for ladies due to the structure of the female body and for hygiene.

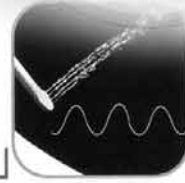

Washing Position Adjustment

Washing/Bidet nozzle position can be adjusted to desired location of respective users making unnecessary any inconvenient body position adjustments of users.

Washing/Bidet move

Widens span of spraying area through continuous dynamic linear movement of nozzle to heighten washing effect.

Massage

Alternating strong/weak water sprays enables massaging effect. Massage function can be simultaneously operated with Washing/Bidet Move function.

Energy Saving

Preset water temperature of 3 different steps is not only convenient but also helps save energy.

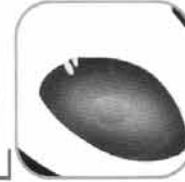

Self Cleaning

Retracted nozzle sprays water on itself automatically following complete usage for a self cleaning effect. Helps maintain clean state of Product.

Anion Deodorant

Clears possible fungus or germs occurring from humidity in the product. Gets rid of odor effectively through ionic ceramic deodorant.

Buffered Seat

Hydraulic damper control is designed to prevent excessive impact on toilet seat when closing seat cover.
